# IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

When buying a motorhome, camper van or urban vehicle (hereafter: motorhome), it is particularly important to choose the right layout and an appealing design. In addition, weight also plays an essential role. Family, friends, optional equipment, accessories and baggage – space must be available for all of these. At the same time, there are legal and technical limits to the configuration and load. Every motorhome is designed for a certain weight, which may not be exceeded during driving. For motorhome buyers, this raises the question: How should I configure my vehicle to accommodate passengers, baggage and accessories according to my needs without the vehicle exceeding this maximum weight? In order to make this decision easier for you, we provide you below with a few tips that are particularly important when selecting your vehicle from our portfolio:

## 1. The technically permissible maximum laden mass...

... is a value set by the manufacturer which the vehicle may not exceed. HYMER specifies a layout-related upper limit for the vehicle, which can vary from layout to layout (e.g. 3,500 kg, 4,400 kg). You can find the corresponding specification for each layout in the technical data.

	ML-T 570	ML-T 580
Standard chassis	Mercedes-Benz Sprinter 415 CDI	Mercedes-Benz Sprinter 415 CDI
Drive	Rear Wheel Drive / All Wheel Drive ○	Rear Wheel Drive / All Wheel Drive ○
kW (hp)	110 (150)	110 (150)
Length / Width / Height (cm)	674 / 222 / 290 <sup>1)</sup>	698 / 222 / 290 <sup>1)</sup>
Body width / Internal width (cm)	212 / 205	212 / 205
Standing height in living area (cm)	198	198
Wheelbase (mm)	3665	3665
Mass in running order (kg)*	2960 (2812 - 3108)*	2980 (2831 - 3129)*
Manufacturer-specified mass for optional equipment (kg)*	182	160
Technically permissible maximum laden mass (kg)*	3500	3500
Technically permissible maximum towable mass (kg)*	2000 <sup>2)</sup>	2000 <sup>2)</sup>
Permitted number of seats (including driver)*	4 <sup>3)</sup>	4 <sup>3)</sup>

## 2. The mass in running order...

... consists – to put it simply – of the basic vehicle with standard equipment plus a standard weight of 75 kg for the driver. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value stated in the sales documents. The permissible tolerance is  $\pm 5\%$ . The permissible range in kilograms is given in brackets after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, HYMER weighs each vehicle at the end of the line and informs your trade partner of your vehicle's weighing result for forwarding to you.

Detailed explanations on the subject of mass in running order can be found in the “Legal Information” section.

# IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

## 3. The permitted number of seats (including driver)...

... is determined by the manufacturer in what is referred to as the type-approval procedure. This results in what is referred to as the mass of the passengers. For this, a standard weight of 75 kg per passenger (without driver) is calculated. Detailed explanations on the subject of mass of the passengers can be found in the "Legal Information" section

	ML-T 570	ML-T 580
Standard chassis	Mercedes-Benz Sprinter 415 CDI	Mercedes-Benz Sprinter 415 CDI
Drive	Rear Wheel Drive / All Wheel Drive ○	Rear Wheel Drive / All Wheel Drive ○
kW (hp)	110 (150)	110 (150)
Length / Width / Height (cm)	674 / 222 / 290 <sup>1)</sup>	698 / 222 / 290 <sup>1)</sup>

Standing height in living area (cm)	198	198
Wheelbase (mm)	3665	3665
Mass in running order (kg)*	2960 (2812 - 3108)*	2980 (2831 - 3129)*
Manufacturer-specified mass for optional equipment (kg)*	182	160
Technically permissible maximum laden mass (kg)*	3500	3500
Technically permissible maximum towable mass (kg)*	2000 <sup>2)</sup>	2000 <sup>2)</sup>
Permitted number of seats (including driver)*	4 <sup>3)</sup>	4 <sup>3)</sup>

## 4. The manufacturer-specified mass for optional equipment...

... is a value set by HYMER per layout for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum pay-mass due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle.

Detailed explanations on the subject of the effects of the tolerances on the minimum pay-mass and the payload can be found in the "Legal Information" section.

## OPTIONAL EQUIPMENT HYMER ML-T

## 5. The additional weight of optional equipment and packages...

... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the pay-mass. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the manufacturer-specified mass for optional equipment.

**\* INFO**

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

△ Not yet known at the time of publication

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

**\* INFO**

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

◆ On request (no extra cost)      — Not possible      □ Available in package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

# STANDARD EQUIPMENT HYMER ML-T CROSSOVER

<b>Chassis</b>	
Mercedes-Benz Sprinter 4.1 t - 419 CDI - 140 KW/190 hp - Euro VI-E	●
<b>Basis</b>	
Permanent All Wheel Drive incl. 93 l fuel tank	●
Exterior cab colour: Tenorite grey (Metallic)	●
Exterior body colour: Crystal-Silver Metallic	●
Mercedes-Benz Original ladder-type frame	●
9G-TRONIC automatic transmission incl. Hold function (x19 CDI)	●
22 l AdBlue tank	●
Adaptive Brake Light	●
Electrically adjustable and heated exterior mirrors	●
Chrome grill	●
Bumper, attachment parts and grill frame painted in vehicle colour	●
Fog lights with cornering light	●
Mud flaps, rear axle	●
Reinforced front axle	●
Trailer hitch pre-installation	●
Heat-insulating glass with band filter on windscreen	●
Windscreen made of laminated glass	●
Heated windscreen	●
16" steel rim (black) with studded tyres (All Terrain)	●
Shelf for smartphones incl. wireless charging with charge level indicator	●
Outside temperature display	●
Electric cab windows and central locking for cab	●
Electric parking brake	●
Driver and passenger airbag	●
Keyless Start (start-stop button for comfortable engine start)	●
Leather steering wheel (automatic transmission only)	●
Steering wheel, height and tilt adjustable	●
Open shelf cockpit passenger side	●
Breakdown kit (air compressor with additional valve)	●
Power steering	●
Fully automatic climate control THERMOTRONIC incl. rain sensor	●
ABS (Anti-lock Brake System) / ASR (Anti-Slip Control) / EBV (Electric Brake Force Distribution) and ESP (Electric Stability Program)	●
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons (surcharge on Cruise Control)	●
Active Brake Assist	●
Active Lane Keeping Assist	●
Automatic headlight control	●
Hill Start Assist	●
Electric immobilizer	●
High Beam Assist	●
Headlight range adjustment	●
Traffic Sign Assist	●
16" steel spare wheel with studded tyres incl. bracket, exterior, fitted on rear wall	●
Cruise Control incl. steering wheel multifunction buttons	●
Halogen H7 headlights in clear glass technology	●
<b>Body</b>	
Optimal PUAL Sandwich insulation alloy / alloy (41 mm floor, 34 mm wall and roof thickness)	●
Garage load up to 350 kg (optional 450 kg). Please note the axle load.	●
GRP lightweight floor with XPS insulation	●
Exterior flap to load the L-shaped seating group from outside, LH side	●
Large garage doors, LH and RH side	●
Electric entrance step, 1-step	●
Exclusive HYMER Multifunctional rear lights in LED-Hybrid technology	●
Skylight (clear glass) above rear bed(s) with blackout blind and mosquito net, 40 x 40 cm	●
Skylight (frosted glass) in bathroom with blackout blind and mosquito net, 40 x 40 cm	●
HYMER panoramic skylight 80 x 50 cm, double-glazed with LED lighting, living room	●
Roof rack with rear ladder without checker plate roof panel	●

LED Lightbar 11"	●
Electric roof vent with function supply and exhaust air at kitchen	●
Design graphics: CrossOver	●
Panoramic skylight above cab, manually hinged	●
Comfort habitation door with window, blackout blind, integrated waste bin as well as 2-way lock	●
Engine / unterride protection	●
<b>Outfitting</b>	
Original Mercedes-Benz Comfort seat, upholstered in living area fabric	●
Front seating group with 2 integrated 3-point belts	●
Mosquito net on habitation door	●
Cab blinds	●
Flyscreen and blackout blinds on all windows	●
Checker plate floor as well as felt trim in the rear garage	●
External shower, located in garage	●
Tool set (folding spade, axe) in rear storage compartment	●
<b>Living and bedroom + lighting</b>	
Comfort L-shaped seating group with lounge cushions, longitudinal / transverse sliding table and 2 built-in 3-point belts	●
Bed conversion for L-shaped seating group incl. lowerable table	●
Sleeping Comfort system with cup-slatted bed frame and Multizone cold foam mattress(es) for rear bed(s)	●
Additional cushion between the longitudinal single beds with ladder	●
Fitted sheets made to measure for rear beds individually adapted to mattress contours	●
4 pillows	●
Partitioning curtain between bed- and living room	●
Ambient lighting	●
Complete LED interior lighting	●
LED awning light	●
<b>Kitchen</b>	
Kitchen drawer with Servo Soft feature	●
Freely arrangeable kitchen drawers, extra wide	●
3-burner cooker with ignition fuse, electric ignition, flame guard and glass cover	●
152 l compressor fridge	●
<b>Bathroom</b>	
Second toilet cassette incl. bracket located in gas bottle compartment	●
Wooden shower slats	●
<b>Installation &amp; Technology</b>	
6 kW Diesel warm air heating with 10 l warm water boiler, altitude kit and 1,800 W electric bar heater	●
Gas bottle compartment with access via the external flap / door	●
LCD keypad for heating	●
230 V external connection with earth leakage circuit breaker for 230 V & 12 V	●
Charging booster for safe charging of the habitation battery while driving (up to 70 A)	●
Reinforced battery, 12 V, 95 Ah AGM	●
Additional sockets: 4 x 230 V / 1 x 12 V / 2 x Twin-USB (USB-A/C) incl. kitchen wall panelling	●
HYMER Smart Battery System (150 Ah Lithium) incl. additional 18 A charger and battery computer	●
Third habitation battery HYMER Smart Battery System (150 Ah Lithium)	●
Solar panel with MPPT controller and display, 2 x 95 W	●
Inverter 12 V to 230 V, 1,800 W with network priority circuit	●
120 l fresh water tank, insulated and heated (20 l in driving position)	●
100 l waste water tank, insulated and heated	●
Electric waste water drainage	●
<b>Multimedia</b>	
10.25" MBUX Multimedia system incl. SatNav, Voice Control, steering wheel multifunction keys, DAB+, Touchscreen as well as reversing camera	●
Radio / TV pre-installation at sideboard incl. 12 V and 230 V socket, 2 speakers in the cab, low-profile bonnet as well as rear bedroom, radio and DVB-T2 antenna	●
<b>Fabrics &amp; Furniture finishes</b>	
Fabric combination: Denver	●
<b>Packages</b>	
CrossOver package ML-T	●

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

- ◆ On request (no extra cost)      — Not possible      □ Available in package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

Chassis	B-MC   550 WhiteLine	B-MC   600 WhiteLine
Mercedes-Benz Sprinter 4.43 t - 417 CDI - 125 KW/170 hp - Euro VI-E	●	●
Basis		
Smooth aluminium skin, Colour: Carrara white	●	●
SLC Chassis (Super Light Chassis / Super lightweight chassis)	●	●
22 l AdBlue tank	●	●
Exterior mirrors suspended, in vehicle colour, electrically heated and adjustable, incl. wide-angle mirror	●	●
Mercedes-Benz noise reduction: Engine compartment insulation and underbody panelling	●	●
Comfort suspension chassis	●	●
Mud flaps, front and rear axle	●	●
LED Daytime running light and LED indicator integrated in HYMER headlights	●	●
Automatic headlight control	●	●
Driver and passenger airbag <sup>91)</sup>	●	●
Cupholder driver and passenger seat	●	●
Keyless Start (start-stop button for comfortable engine start)	●	●
ABS (Anti-lock Brake System) / ASR (Anti-Slip Control) / EBV (Electric Brake Force Distribution) and ESP (Electric Stability Program)	●	●
Crosswind Assist	●	●
Cupholder instead of storage compartment	●	●
Trailer hitch pre-installation	●	●
Warm air auxiliary heating, electric	●	●
9G-TRONIC automatic transmission incl. Hold function	●	●
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons (surcharge on Cruise Control)	●	●
Leather steering wheel (automatic transmission only)	●	●
Cruise Control incl. steering wheel multifunction buttons	●	●
92 l fuel tank	●	●
Chrome version front (grill / fog light cover)	●	●
Electric parking brake	●	●
Reinforced front axle	●	●
Semi-automatic climate control TEMPMATIK	●	●
16" alloy wheels (black) with all season tyres	●	●
Active Brake Assist <sup>46)</sup>	●	●
Body		
Electric entrance step, 1-step	●	●
Exclusive HYMER Multifunctional rear lights in LED-Hybrid technology	●	●
Garage load up to 350 kg (optional 450 kg). Please note the axle load.	●	●
Large garage doors, LH and RH side	●	●
Large loading compartment with external access incl. extra deep cellar compartment and access from the inside	●	●
Optimal PUAL Sandwich insulation alloy / alloy (41 mm floor, 34 mm wall and roof thickness)	●	●
Heated double floor incl. cellar compartments	●	●
GRP lightweight floor with XPS insulation	●	●
HYMER panoramic skylight 80 x 50 cm, double-glazed with LED lighting, living room	●	●
Skylight (clear glass) above rear bed(s) with blackout blind and mosquito net, 40 x 40 cm	●	●
Skylight (frosted glass) in bathroom with blackout blind and mosquito net, 40 x 40 cm	●	●
Skylight (frosted glass) above separate shower with blackout blind, mosquito net as well as integrated clothes rail, 40 x 40 cm	●	●
Cab door with electric power windows and entry lighting	●	●
Awning with adapter, white housing, 450 x 250 cm	●	●
Comfort habitation door with window, blackout blind, integrated waste bin as well as 2-way lock	●	●
Design graphics: WhiteLine	●	●
Outfitting		
Cab seats, upholstered in living area fabric, swivelling, height- and tilt adjustable with 2 armrests	●	●
Luxury table: 360° rotatable, longitudinally and transversably displaceable	●	●
Cab blinds made of high-quality pleated fabric	●	●
Mosquito net on habitation door	●	●
Drawer and insert tray storage space in seating group	●	●
Living and bedroom + lighting		
Pull-down bed, manual	●	●

	B-MC I 550 WhiteLine	B-MC I 600 WhiteLine
Function integration into furniture elements	●	●
Multi-zone cold foam mattress incl. high-quality mattress pad (knitted fabric) for ventilation in the rear	●	●
Modern, linear interior design	●	●
Optimal space and generous sense of space	●	●
Complete LED interior lighting	●	●
LED worktop lighting	●	●
Night lighting with toggle switch	●	●
LED awning light	●	●
Comfort L-shaped seating group with lounge cushions, longitudinal / transverse sliding table and 2 built-in 3-point belts	●	●
Bed conversion for L-shaped seating group incl. lowerable table	●	●
4 pillows	●	●
Fitted sheets made to measure for rear beds individually adapted to mattress contours	●	●
Ambient light system : 4-level light system with dynamic and individual control of the illumination (incl. light temperature) as well as atmospheric base illumination <sup>114)</sup>	●	●
<b>Kitchen</b>		
Kitchen drawer with Servo Soft feature	●	●
Freely arrangeable kitchen drawers, extra wide	●	●
142 l Smart-Tower fridge	●	●
Extra deep sink with tight-fitting chopping board and high water tap	●	●
Large cooker with glass cover and front panel operation	●	●
<b>Bathroom</b>		
Wooden shower slats	●	●
<b>Installation &amp; Technology</b>		
6 kW gas warm air heating with 10 l warm water boiler	●	●
LCD keypad for heating	●	●
Cab heating concept with increased warm air heating incl. heated dashboard in the living condition	●	●
Warm air heating in the rear bedroom, adjustable separately	●	●
7" touch display for convenient control and monitoring of important vehicle features and components	●	●
HYMER Connect: Control and monitor important components and features of your vehicle conveniently with the HYMER Connect app - anytime, anywhere.	●	●
Extra low gas bottle compartment for easy gas bottle change with comfy access via external door	●	●
Reinforced battery, 12 V, 95 Ah AGM	●	●
Charging booster for safe charging of the habitation battery while driving (up to 70 A)	●	●
180 l fresh water tank, insulated and heated (20 l in driving position)	●	●
150 l waste water tank, insulated and heated	●	●
Electric waste water drainage with dashboard switch	●	●
Additional sockets: 4 x 230 V / 1 x 12 V / 1 x Twin-USB (incl. kitchen wall panelling)	●	●
<b>Multimedia</b>		
Radio / TV pre-installation incl. 12 V and 230 V socket, 2 speakers in the cab, the front bed as well as the rear bedroom, radio and DVB-T2 antenna	●	●
10.25" MBUX Multimedia system incl. SatNav, Voice Control, steering wheel multifunction keys, DAB+, Touchscreen as well as reversing camera	●	●
32" LED-TV with built-in speakers, remote control, DVD drive, HYMER Smart-Multimedia system with Bluetooth® (DVB-T / C, DVB-S2) incl. receiver	●	●
Digital satellite dish, 80 cm, without receiver	●	●
32" TV bracket	●	●
<b>Fabrics &amp; Furniture finishes</b>		
Furniture finish: Grand Oak	●	●
Fabric combination: Janeiro	●	●

● Standard      ○ Optional extra      ▲ Mandatory      △ Not yet known at the time of publication      Please note the information on page 85  
 ◆ On request (no extra cost)      — Not possible      □ Available in package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

# PRICES AND TECHNICAL DATA

## HYMER B-CLASS MASTERLINE T

	B-ML T 780
Price <sup>a)£</sup>	106,590.-
Standard chassis	Mercedes-Benz Sprinter 415 CDI
Drive	Front Wheel Drive
kW (hp)	110 (150)
Length / Width / Height (cm)	789 / 235 / 296 <sup>1)</sup>
Body width / Internal width (cm)	225 / 218
Standing height in living area (cm)	198
Wheelbase (mm)	4500
Mass in running order (kg)*	3255 (3092 - 3418)*
Manufacturer-specified mass for optional equipment (kg)*	806
Technically permissible maximum laden mass (kg)*	4430
Technically permissible maximum towable mass (kg)*	1450 <sup>2)</sup>
Permitted number of seats (including driver)*	4 - 5 <sup>3)</sup>
Insulation Floor / Wall / Roof (mm)	41 / 34 / 34
Overall clearance storage- / garage door resp. flap W x H (cm)	110 x 123
Bed dimension: Rear bed L x W (cm)	207 - 202 x 90
Bed dimension: Central bed L x W (cm)	205 x 110 - 50
Berths	2 - 3 <sup>0</sup>
Bathroom W x D (cm)	90 x 80
Separate shower W x D (cm)	73 x 77
Wardrobe W x D x H (cm)	30 x 57 x 190
Kitchen, W x D x H, approx. cm	107 x 58-96 x 93
Fridge volume (of which freezer compartment) (l)	153
Standard heating	Gas warm air, 6 kW
Gas bottle storage (Filling weight)	2x 11kg
Total fresh water tank capacity (l)	180
Fresh water tank in driving filling level (l)	20
Waste water tank (l)	150
Standard habitation battery (Ah)	95 AGM
Sockets: 230 V / 12 V / USB	4 / 2 / 6

**\* INFO**

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

# STANDARD EQUIPMENT HYMER B-CLASS MASTERLINE T

B-ML T 780

<b>Chassis</b>	
Mercedes-Benz Sprinter 4.43 t - 415 CDI - 110 KW/150 hp - Euro VI-E	●
<b>Basis</b>	
Exterior colours: White cab / White body	●
Exterior body colour: White	●
Low-frame chassis with through-loading feature	●
SLC Chassis (Super Light Chassis / Super lightweight chassis)	●
6-speed transmission	●
22 l AdBlue tank	●
92 l fuel tank	●
Automatic headlight control	●
Electrically adjustable and heated exterior mirrors	●
Mercedes-Benz noise reduction: Engine compartment insulation and underbody panelling	●
Comfort suspension chassis	●
Daytime Running Light integrated in headlights	●
Reinforced front axle	●
Trailer hitch pre-installation	●
Heat-insulating glass with band filter on windscreen	●
16" steel rims with full wheel cover and all season tyres	●
Electric cab windows and central locking for cab	●
Electric parking brake	●
Driver and passenger airbag	●
Cupholder driver and passenger seat	●
Semi-automatic climate control TEMPMATIK	●
Keyless Start (start-stop button for comfortable engine start)	●
Multifunctional steering wheel	●
Warm air auxiliary heating, electric	●
ABS (Anti-lock Brake System) / ASR (Anti-Slip Control) / EBV (Electric Brake Force Distribution) and ESP (Electric Stability Program)	●
ECO Start-Stop feature	●
Cruise Control incl. steering wheel multifunction buttons	●
Active Brake Assist	●
Crosswind Assist	●
<b>Body</b>	
65 cm Maxi Comfort habitation door with inner shell, 2-way lock, window with blackout blind and waste bin	●
Electric entrance step, 1-step	●
Exclusive HYMER Multifunctional rear lights in LED-Hybrid technology	●
Garage load up to 350 kg (optional 450 kg). Please note the axle load.	●
Large garage doors, LH and RH side	●
Large through-loading compartment with external access from both sides incl. extra deep basement compartment and access from the inside	●
Insulated GRP rear panel with integrated third brake light and design elements	●
Optimal PUAL Sandwich insulation alloy / alloy (41 mm floor, 34 mm wall and roof thickness)	●
Heated double floor incl. cellar compartments	●
GRP lightweight floor with XPS insulation	●
Skylight (clear glass) above rear bed(s) with blackout blind and mosquito net, 40 x 40 cm	●
Skylight (frosted glass) in bathroom with blackout blind and mosquito net, 40 x 40 cm	●
Skylight (frosted glass) above separate shower with blackout blind, mosquito net as well as integrated clothes rail, 40 x 40 cm	●
Panoramic skylight above cab, manually hinged	●
HYMER panoramic skylight 80 x 50 cm, double-glazed with LED lighting, living room	●
<b>Outfitting</b>	
Original Mercedes-Benz Comfort seat, upholstered in living area fabric <sup>45)44)</sup>	●
Cab blinds	●
Mosquito net on habitation door	●
Front seating group with 2 integrated 3-point belts	●
<b>Living and bedroom + lighting</b>	
Function integration into furniture elements	●
Modern, linear interior design	●
Optimal space and generous sense of space	●
Sleeping Comfort system with cup-slatted bed frame and Multizone cold foam mattress(es) for rear bed(s)	●
Lighting dimmable (via push button)	●
Complete LED interior lighting	●
LED worktop lighting	●

LED awning light	●
Ambient light system : 4-level light system with dynamic and individual control of the illumination (incl. light temperature) as well as atmospheric base illumination <sup>114)</sup>	●
<b>Kitchen</b>	
Pantry	●
Kitchen drawer with Servo Soft feature	●
Freely arrangeable kitchen drawers, extra wide	●
Structure wall panelling also serving as splash guard	●
153 l Jumbo fridge	●
Extra deep sink with tight-fitting chopping board and high water tap	●
Large cooker with glass cover and front panel operation	●
<b>Installation &amp; Technology</b>	
6 kW gas warm air heating with 10 l warm water boiler	●
Warm air heating in the rear bedroom, adjustable separately	●
LCD keypad for heating	●
Extra low gas bottle compartment for easy gas bottle change with comfy access via external door	●
7" touch display for convenient control and monitoring of important vehicle features and components	●
HYMER Connect: Control and monitor important components and features of your vehicle conveniently with the HYMER Connect app - anytime, anywhere. <sup>93)</sup>	●
Twin USB at seating group	●
Charging booster for safe charging of the habitation battery while driving (up to 70 A)	●
Reinforced battery, 12 V, 95 Ah AGM	●
180 l fresh water tank, insulated and heated (20 l in driving position)	●
150 l waste water tank, insulated and heated	●
Electric waste water drainage with dashboard switch	●
<b>Multimedia</b>	
DAB Radio pre-installation	●
Radio / TV pre-installation incl. 12 V and 230 V socket, 2 speakers in the cab, the front bed as well as the rear, radio and DVB-T2 antenna	●
<b>Fabrics &amp; Furniture finishes</b>	
Furniture finish: Grand Oak	●
Fabric combination: Janeiro	●
<b>Packages</b>	
Extended standard equipment without surcharge	●

◆ On request (no extra cost)      — Not possible      □ Available in package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

 ◆ On request (no extra cost) — Not possible □ Available in package

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

# PACKAGES HYMER B-CLASS MASTERLINE I

 ◆ On request (no extra cost)      — Not possible      □ Available in package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

# PRICES AND TECHNICAL DATA HYMER VENTURE S

	Venture S
Price <sup>a</sup> £	197,540.-
Standard chassis	Mercedes-Benz Sprinter 419 CDI
Drive	All Wheel Drive
kW (hp)	140 (190)
Length / Width / Height (cm)	645 / 216 / 307 <sup>1)</sup>
Body width / Internal width (cm)	207 / 200
Roof type	Sleeping roof
Standing height in living area (cm)	196
Wheelbase (mm)	3665
Mass in running order (kg)*	3565 (3387 - 3743)*
Manufacturer-specified mass for optional equipment (kg)*	375
Technically permissible maximum laden mass (kg)*	4100
Technically permissible maximum towable mass (kg)*	1780 <sup>2)</sup>
Permitted number of seats (including driver)*	2
Insulation Floor / Wall / Roof (mm)	41 / 34 / 34
Bed dimension: Rear bed L x W (cm)	190 x 120 - 110
Bed dimension: Sleeping roof, L X W, approx. cm	210 - 140 x 140
Berths	4
Bathroom W x D (cm)	127 x 67
Separate shower W x D (cm)	64 x 74
Wardrobe W x D x H (cm)	30 x 540 x 196
Kitchen, W x D x H, approx. cm	168 x 60 x 93
Standard heating	Diesel warm air, 6 kW
Gas bottle storage (Filling weight)	1x 5kg
Total fresh water tank capacity (l)	120
Fresh water tank in driving filling level (l)	20
Waste water tank (l)	100
Additional habitation batteries (Ah)	4x80 Ah Lithium
Sockets: 230 V / 12 V / USB	6 / 6 / 9

**\* INFO**

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER. The real weight of your vehicle works can only be determined when it is weighed at the end of the line. If, in

exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations in the footnotes section.

# STANDARD EQUIPMENT HYMER VENTURE S

<b>Chassis</b>	
Mercedes-Benz Sprinter 4.1 t - 419 CDI - 140 KW/190 hp - Euro VI-E	●
<b>Basis</b>	
Pastel: Pebble grey	●
Bumper, wheel arch and attachments made in ELASTOCOAT	●
9G-TRONIC automatic transmission incl. Hold function	●
Permanent All Wheel Drive incl. 93 l fuel tank	●
22 l AdBlue tank	●
Electrically adjustable and heated exterior mirrors	●
Electric parking brake	●
Fog lights with cornering light	●
Mud flaps, rear axle	●
Daytime Running Light integrated in headlights	●
Reinforced front axle	●
Heat-insulating glass with band filter on windscreen	●
Heated windscreen	●
16" steel rim (black) with studded tyres (All Terrain)	●
Shelf for smartphones incl. wireless charging with charge level indicator	●
Electric cab windows and central locking for cab	●
Driver and passenger airbag	●
Dashboard charging pack (2 USB-C connections with 5 V as well as one additional 12 V socket)	●
Leather steering wheel (automatic transmission only)	●
Steering wheel, height and tilt adjustable	●
Fully automatic climate control THERMOTRONIC incl. rain sensor <sup>134)</sup>	●
Wet Wiper System (windscreen wiper with integrated spray nozzles)	●
ABS (Anti-lock Brake System) / ASR (Anti-Slip Control) / EBV (Electric Brake Force Distribution) and ESP (Electric Stability Program)	●
Active Distance Assist DISTRONIC+ incl. steering wheel multifunction buttons	●
Active Brake Assist	●
Active Lane Keeping Assist	●
Automatic headlight control	●
Hill Start Assist	●
High Beam Assist	●
Keyless Start (start-stop button for comfortable engine start)	●
Traffic Sign Assist	●
<b>Body</b>	
Design graphics in honeycomb look	●
Optimal PUAL Sandwich insulation alloy / alloy (41 mm floor, 34 mm wall and roof thickness)	●
GRP lightweight floor with XPS insulation	●
Rear platform with load capacity up to 350 kg	●
Airline rails on tailgate	●
Comfort-Plus habitation door incl. closing aid, RFID (keyless) access as well as central locking	●
External rear storage compartments, RH and LH side	●
Electric entrance step, 1 step, incl. Coming Home feature	●
Exclusive HYMER Multifunctional rear lights in LED-Hybrid technology	●
LED Light bar above cab	●
Front and rear underride protection	●
Underfloor storage box, LH side	●
Panorama window rear seating group	●
Framed kitchen window	●
Skylight sleeping roof, 40 x 40 cm	●
Skylight above seating group, 40 x 40 cm	●
<b>Outfitting</b>	
Mercedes-Benz Comfort seat in living area fabric, height- and tilt adjustable, swivelling, with 2 armrests and integral look <sup>45) 44)</sup>	●
Seat base trim in leatherette on cab seats	●
Cab blinds	●
Mosquito net on habitation door and rear platform	●
Comfort push locks with genuine leather loops	●
Multifunctional wall panels with aluminium profiles (in bamboo look)	●
Desk / PC workstation with folding bamboo tabletop	●
Cab storage system with felt trim boxes	●
Stairway with bamboo steps	●

Lashing eyes on seating group	●
Felt-look wall panelling	●
Living room table with solid bamboo top, sliding	●
External shower in external storage compartment, LH side	●
<b>Living and bedroom + lighting</b>	
4 pillows	●
HYMER Premium mattress with adjustable firmness level	●
Fitted sheets for sleeping roof	●
Complete LED interior lighting, warm white, dimmable	●
Ambient lighting (1 pendant luminaire, 2 luminaires in multifunctional wall)	●
<b>Kitchen</b>	
Worktop extension incl. chopping board	●
Freely arrangeable kitchen drawers, extra wide	●
FENIX kitchen worktop, extra matt, anti-fingerprint	●
Waste bin	●
2-burner hob	●
<b>Bathroom</b>	
Bathroom window	●
Make-up mirror, magnetic	●
Bamboo shower column	●
<b>Installation &amp; Technology</b>	
6 kW diesel warm air heating with warm water boiler as well as altitude kit	●
Warm air heating in the bedroom, can be regulated separately	●
7" touch display for convenient control and monitoring of important vehicle features and components	●
HYMER Smart Battery System 2.0 (4 x 80 Ah lithium) incl. additional 18 A charger and battery computer	●
Charging booster for safe charging of the habitation battery while driving (up to 70 A)	●
3 x 115 W solar panels with MPPT control	●
Inverter 12 V to 230 V, 1,300 Watt incl. 70 A additional charger	●
120 l fresh water tank, insulated and heated (20 l in driving position)	●
100 l waste water tank, insulated and heated	●
Electric waste water drainage	●
Water filter for fresh water system	●
<b>Multimedia</b>	
2 cab speakers, radio and DVB-T2 antenna	●
Networking of the technical components of vehicle body construction	●
10.25" MBUX Multimedia system incl. SatNav, Voice Control, steering wheel multifunction keys, DAB+, Touchscreen as well as reversing camera <sup>57)</sup>	●
Mobile SONOS Smartspeaker incl. bracket for multifunction wall	●
<b>Fabrics &amp; Furniture finishes</b>	
Furniture finish: Native Bamboo	●
Fabric combination: Indiana	●
Cab carpet Venture S	●

● Standard      ○ Optional extra      ▲ Mandatory      △ Not yet known at the time of publication      Please note the information on page 85  
 ◆ On request (no extra cost)      — Not possible      □ Available in package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional

equipment shown in the model overviews. This is a calculated value for each type and layout that HYMER uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

# IMPORTANT NOTES

## Abbreviations

ABS - Anti-lock Braking System

ASR - Anti-Slip Control - Traction Control

EDS - Electronic Differential Lock

ESC - Electronic Stability Control - ESP

HBA - Hydraulic Brake Assist

LAC - Load Adaptive Control

MSR - Engine Drag Torque Control

EBV - Electronic Brake-Force Distribution

Any modification in the Original factory condition of your vehicle may result in impaired driving and / or driving safety.

Please note that the standard equipment may be omitted when ordering optional extras. Individual package contents can sometimes be ordered individually. Since not all dependencies of optional extras can be listed here, please check with your HYMER dealer.

Accessories and original spare parts recommended by Hymer GmbH & Co KG are designed, developed and approved specifically for your vehicle. Your HYMER dealer supplies these products; he is informed about all the technical details and can perform the necessary work in the correct manner. Accessories, add-on, conversion or installation parts not approved by Hymer GmbH & Co KG may cause damage to the vehicle and impair road safety. Even if an expert's report, a parts BE or a type approval is available for these parts, there is no presumption of the proper condition of the product. Please understand that for any damage caused by non-approved products or not permitted changes, Hymer GmbH & Co KG CANNOT be made liable.

Weight figures are approximate values. The payload stated in the price list is reduced by the weights stated in the price list if optional extras are fitted.

Please note: The alternative engine options available at extra cost, as well as all other chassis options such as automatic transmission and air conditioning, result in a change in weight. The additional weight of the individual chassis and engine variants as well as chassis options are always indicated in the chassis-related optional extras in the individual optional extras lists.

Please note: A maximum of 2 child seats are permitted on the bench seat in the living area, provided the table is removed and securely stowed. On an L-shaped seating group with fixed table, only one child seat is permitted beside the window. For this purpose, the side cushion must be removed and the table top moved towards the centre of the vehicle and locked in place. Please observe the exact instructions in the corresponding operating instructions. Please ensure that you observe the prescribed axle load when installing special parts attached to the rear of the vehicle, such as a motorcycle rack or trailer hitch.

The prices indicated are only valid for optional extras if fitted with the production of a new vehicle. The retrofitting of certain optional extras is sometimes not possible or associated with considerable additional costs.

This price list includes the series status at the time of printing. Despite checking the contents, errors can not be excluded. In the course of the model year, we reserve the right to change equipment and to make product improvements. The layouts are partially shown with optional extras available at extra cost, these are not part of the standard scope of delivery.

The water installation system is at least state-of-the-art as of 07/2011 (EG directive 2002/72/EG).

Before signing a sales contract, please inform yourself about our current product and series status with one of our approved HYMER dealers.

All prices are non-binding recommended retail prices in GBP including the legally valid value added tax (VAT), freight from Germany, first registration fee and pre-delivery inspection. For deliveries after the 31<sup>st</sup> of December 2020 import duties may apply. These are not included in the price and are charged separately.

Changes in price, design and equipment are possible without prior notice.

a) This is a recommended retail price based on German retail prices. Prices in other countries may differ due to currency conversion and country-specific VAT, fees and import duties. For the latest information, please ask a local dealer for the prices applicable in your country.

This price list supersedes all previous ones.

## Collection / Pick-up:

Collection / Pick-up of your HYMER motorhome at the factory is not possible.

# FOOTNOTES

- 1) Overall width corresponds the measurement incl. wheel arches.
- 2) a) Up to 12 % incline: With increasing altitude, the engine power inevitably decreases. From 1,000 m above sea level and every further 1,000 m, 10 % of the trailer load must be deducted from the total towing capacity. b) The specification is the maximum towing capacity, taking into account the overall towing weight of the chassis variant. The overall towing weight and thus the towing capacity may vary depending on the equipment / chassis variant. Please contact us in this regard, we will be happy to calculate the towing capacity of your individual vehicle.
- 3) The number of persons stated may be reduced if the mass in running order increases. This increase occurs in particular if the engine version differs from the basic version, if optional extras are fitted and if a corresponding equipment version is selected. Use the weight information in the price list or talk to your HYMER dealer to make sure that the technically permissible total mass is not exceeded and that there is sufficient loading capacity for persons and items.
- 4) The changeover of the emissions stage from Euro 6d final to Euro 6e is expected to take place from spring 2023. Up-to-date information is available from our dealers.
- 5) In the event of an accident, the brakes are automatically locked to prevent a possible secondary collision.
- 6) For vehicles with transverse bed, the LH side opening window at the rear is only available as optional extra.
- 7) Only available in combination with large refrigerator.
- 8) Body colour Crystal Silver not available in combination with exterior cab colour Campovolo grey.
- 9) When selecting the optional 9G automatic transmission, the additional weight of the selected engine or chassis variant is already included. Therefore, the additional weights of the engine and chassis variants do not have to be taken into account.
- 10) Only available in combination with optional 16" alloy wheels with 225/75 R16 tyres for Fiat Ducato Maxi chassis or 16" steel rims.
- 11) Option not available in combination with chassis variant: 2.2 MultiJet - 88 kW / 120 hp.
- 12) LED headlights are only available in combination with the optional LED Daytime Running Lights.
- 13) When ordering this optional extra, the Standard variant is not included.
- 14) Not available in combination with the optional automatic transmission.
- 15) Only available in combination with the optional Automatic AirCon with pollen filter.
- 16) Data exchange (mirroring of information) does not take place between the fully digital cockpit and the Multimedia SatNav system with 9" touchscreen.
- 17) Fully digital cockpit only available in combination with Fiat Infotainment system incl. 10" touchscreen or Multimedia SatNav system with 9" touchscreen.
- 18) Brackets for awnings feet are supplied loose.
- 19) Increased garage load of 450 kg taking into account the axle loads and the permissible total weight.
- 20) GRP roof coating doesn't match the vehicle colour. The surface quality of the GRP coating does not correspond to a painted outer panel.
- 21) Surcharge to door with 1-way lock and window.
- 22) Roof AirCon and electric roof vent are mutually exclusive. Only one of these options can be ordered.
- 23) Due to manufacturer's instructions, please refer to the maximum speed of 150 km/h. Nevertheless, note the traffic regulations of your country as well as vehicle information.
- 24) UK only: The automatic gas cylinder switchover system with crash sensor and IceEx is included in the standard scope of supply due to a legal requirement.
- 25) Due to manufacturer's instructions, we recommend to order the gas filter when ordering the optional automatic gas bottle switchover with Crash Sensor and IceEx.
- 26) Second habitation battery (95 Ah AGM) incl. additional 18 A charger and HYMER Smart Battery system can not be ordered and fitted at the same time. Only one of these options can be ordered.
- 27) The HYMER Smart Battery System (HY-Tec Lithium Battery 150) significantly extends the available electrical energy and thus the self-sufficient standing time of your motorhome. The LE300 offers a 200 % increase in available battery capacity with practically identical installation space (compared to standard 95Ah AGM\_II batteries), combined with a weight saving of around 6 kg (approx. -22 %). This expandable solution increases the capacity and performance of the lead-acid batteries while increasing the efficiency and lifespan of the overall system. The lithium batteries are connected in parallel to the lead batteries. In this process, the lithium batteries take over most of the charging cycles, whilst the lead batteries act as backup storage. The battery computer regulates the optimal charge/discharge and also displays the state of charge.
- 28) Second habitation battery (95 Ah AGM), HYMER Smart Battery System (50 Ah Lithium) and HYMER Smart Battery System (150 Ah Lithium) incl. 18 A auxiliary charger cannot be ordered at the same time or fitted inside one vehicle. Only one of these options can be ordered.
- 29) Electric floor tempering only available for the walk-in area. Pedestal is heated with warm air and floor openings are not heated.
- 30) SatNav device incl. automatic switching from starter to habitation battery and selector switch for driving and camping operation.
- 31) HYMER Smart Control: Simple status query of water levels and battery voltage via the operating unit of the SatNav device.
- 32) Only available in combination with TV pre-installation / TV-bracket.
- 33) Second LED-TV only available in combination with the first LED-TV.
- 34) With the LED headlights option, the LED daytime running lights are already integrated.
- 35) Only available in combination with 9G automatic transmission.
- 36) Halogen fog lights are not available in combination with HYMER Full-LED headlights.
- 37) Only available in combination with the optional height and tilt adjustment for pilot seats (A-Class models only).
- 38) Electric cab door step only available in combination with optional cab door.
- 39) 40 x 40 cm skylight not available in combination with the optional front overhead lockers instead of pull-down bed.
- 40) Mass in running order according to regulation VO (EU) No. 1230/2012 including basic equipment (75 kg for driver, filled fuel tank, filled water tank in driving position with 20 l, gas in an aluminium bottle at 100% and electrical connection cable) in the basic variant. The mass in running order (and the possible load or number of persons) changes with different engine or equipment variants and by adding optional extras. Deviations within factory tolerances are possible and permissible.

- 41) The HYMER Smart Battery System (HY-Tec Lithium Battery 50) significantly extends the available electrical energy and thus the self-sufficient standing time of your motorhome. The HY-Tec-Lithium battery 50 offers a significant weight saving of 20 kg with the same capacity compared to a standard 95Ah AGM\_II battery and requires only 1/3 of the space. This expandable solution increases the capacity and performance of the lead-acid batteries while increasing the efficiency and lifespan of the overall system. The lithium batteries are connected in parallel to the lead batteries. In this process, the lithium batteries take over most of the charging cycles, while the lead batteries act as backup storage. The battery computer regulates the optimal charge/discharge and also displays the state of charge.
- 42) Option incl. automatic radio switchover from cab to habitation battery.
- 43) Mercedes-Benz Sprinter 31x chassis with permissible total weight of 3,500 kg cannot be uprated. Please keep this in mind when ordering.
- 44) Original Mercedes-Benz seats are swivelling, as well as longitudinally / tilt and height adjustable, headrest can be used.
- 45) All adjustment options are available on the Original Mercedes-Benz seats in integral optics.
- 46) Active Brake Assist standard for Mercedes-Benz Sprinter 41x CDI.
- 47) Not available in combination with trailer hitch or trailer hitch pre-installation and 450 kg frame extension.
- 48) The options " Chrome grill" as well as "Bumper, add-on parts and grill frame painted in vehicle colour" are only available in combination.
- 49) Only available in combination with exterior colours: HYMER white, Iridium silver, Tenorite grey or Obsidian black.
- 50) The options trailer hitch pre-installation and removable trailer hitch ball head (incl. pre-installation) are only available ex works and cannot be retrofitted. Please note this when ordering.
- 51) Only available in combination with Equipment Line Premium.
- 52) Design graphics Tenorite only possible in combination with exterior colour Tenorite grey.
- 53) When choosing this option, a 40 x 40 cm skylight is fitted in the living area instead of the 80 x 50 panorama skylight.
- 54) Only available in combination with the optional "6 kW warm air heating with 1,800 W electric bar heating, warm water boiler and 142 l absorber fridge" or "6 kW warm air heating with warm water boiler and 142 l absorber fridge".
- 55) If ordered with gas warm air heating, a larger gas bottle compartment (2 x 11 kg) is required. Kitchen drawers are therefore sometimes smaller or, depending on the layout, replaced by a flap.
- 56) With this option, the Original Mercedes-Benz seats are designed in integral optics.
- 57) Vehicle dimensions and weights can not be entered separately in the SatNav device.
- 58) Only available in combination with Mercedes-Benz 10.25" MBUX Multimedia System, Equipment line Plus or Equipment line Premium.
- 59) ECO Start-Stop is not available for the Grand Canyon S with 319 CDI engine and ML-T with 419 CDI engine.
- 60) All Wheel Drive only available in combination with Mercedes-Benz Sprinter 319 / 419 CDI.
- 61) All Wheel Drive only available in combination with 9G-TRONIC automatic transmission.
- 62) When ordering the optional All Wheel Drive, the overall height increases by approx. 9 cm.
- 63) All Wheel Drive is supplied with summer tyres only.
- 64) Towing capacity and axle loads are reduced when ordered with the optional All Wheel Drive.
- 65) RHD chassis: LED headlights and All Wheel Drive are mutually exclusive. Only one of these options can be ordered.
- 66) Engine compartment noise reduction insulation and engine / underride protection cannot be ordered at the same time. Only one of these options is possible.
- 67) Only available in combination with the Comfort habitation door with window, blackout blind, integrated waste bin and 2-way lock.
- 68) All Wheel Drive option not available in combination with the following optional extras: 17" alloy wheels.
- 69) Only available in combination with All Wheel Drive.
- 70) The optional tyre pressure sensors are not available in combination with the optional studded tyres.
- 71) The 16" studded tyres can only be ordered directly from the factory.
- 72) Remember that the maximum permissible speed with these tyres is 120 km/h.
- 73) Not available in combination with the optional 17" rims.
- 74) Not available in combination with bicycle rack.
- 75) The 16" steel spare wheel incl. studded tyres is only available in combination with the 16" steel rims (black) with studded tyres.
- 76) When ordering tyre pressure sensors, the spare wheel is always delivered with a sensor. If the tyre pressure sensors option is not selected on the base vehicle, the spare wheel may still be equipped with a sensor.
- 77) Roof rack with ladder and checker roof plate not available in combination GRP roof coating.
- 78) Solar panels not available in combination with roof rack and rear ladder and checker roof plate (except B-MC I 550).
- 79) Please note when ordering: Roof rack with rear ladder only available ex works. Retrofitting is not possible.
- 80) Not available in combination with the spare wheel fitted on the rear wall (exterior).
- 81) ML-T 570: Panoramic skylight above the rear bed not available in combination with 2 x 95 W solar panels.
- 82) 6 kW diesel warm air heating with warm water boiler and electric heating element option not available in combination with floor temperature control (electric) in living area and central passageway.
- 83) Warm water heating can be regulated separately via shut-off valve.
- 84) Electric floor tempering not available in combination with warm water heating or warm water floor heating.
- 85) When ordering the optional MBUX, the Mercedes combi colour display is added as well as an acoustic package, which includes noise dampening in the doors as well as dampening in the dashboard and in the windscreen area.
- 86) Arctic package only available in combination with Comfort habitation door.
- 87) Overall width corresponds the measurement incl. wheel arches.
- 88) Mass in running order according to VO (EU) No. 1230/2012 incl. basic equipment (75 kg for driver, full fuel tank, water tank filled to driving position with 20 l, gas in an aluminium bottle at 100 % and electric connection cable) in the standard variant. The mass in running order (as well as the possible payload or permitted passengers) changes with different engines or equipment variants or by adding optional extras. deviations within the scope of the factory tolerances are possible and permissible.
- 89) Up to 12 % incline: With increasing altitude, the engine power inevitably decreases. From 1,000 m above sea level and every further 1,000 m, 10 % of the trailer load must be deducted from the total towing capacity.
- 90) The number of people specified will be reduced if the mass in running order increases. An increase occurs in particular in a different engine from the base engine, when ordering / installing optional extras and when choosing a corresponding equipment level. Check the weight information in the price list or in consultation with your HYMER motorhome dealer to ensure that the technically permissible maximum mass is not exceeded and sufficient loading capacity remains for persons and utensils.

- 91) Please note: The front passenger airbag can not be deactivated! Therefore, it is not allowed to attach child seats with restraint system against direction of travel on the front passenger seat.
- 92) When ordering the pull-down bed option, the standard panoramic skylight in the living area is not fitted.
- 93) HYMER Connect App also allows remote control via smartphone. Remote access and control via app and associated fees are included for a period of 2 years. After this period, various functions can still be used to a limited extent.
- 94) When ordering the 16" alloy wheels by Mercedes-Benz in combination with the Mercedes-Benz Sprinter 41x CDI chassis, the weight variant 4,500kg becomes possible.
- 95) Weight variant 4.5 t only available in combination with Original 16" Mercedes-Benz alloy wheels and must be ordered separately.
- 96) B-MC 680 / 690: Only available in combination with lowerable double bed above the seating group.
- 97) When ordering the lowerable double bed above the seating group, the max. awning length is 4 m.
- 98) Maximum towable mass, taking into account the total towing weight. The total towing weight is 5,500 kg (up to and including 3.5 t permissible total weight) and 5,880 kg (over 3.5 t permissible total weight). Total towing weight and thus trailer load may vary depending on equipment / chassis variant. If you have any questions, please contact your HYMER dealer, they will be pleased to calculate the towing capacity of your individual vehicle.
- 99) Hydraulic lift jack system option not possible in combination with the optional rear comfort steadies.
- 100) When ordered with lowerable double bed above seating group, the optional solar system 2 x 95 W is not available in combination with options 2,400 W roof AirCon and / or electric roof vent.
- 101) B-MC T 550: Panoramic skylight above the rear bed not available in combination with 2 x 95 W solar panels.
- 102) Only available in combination with automatic transmission and cup holder.
- 103) The options 5th seat and bed conversion kit for L-shaped seating group change the contour of the side couch.
- 104) B-MC I / T 600: Warm water heating and 5th seating are mutually exclusive. Only one of these options can be ordered.
- 105) When fitting the ISOFIX option, the inclination of the seat cushion changes.
- 106) Only available in combination with bed conversion for comfort L-shaped seating group or seating group incl. additional cushion and lowerable table.
- 107) Only available in combination with fabric: Janeiro, Lorane or Jandia.
- 108) Two Isofix places are provided.
- 109) Only available in combination with L-shaped seating group.
- 110) When ordering the optional "Premium round table", the space behind the LH cab seat / seating group is reduced. In the cab seats' rearmost locking position, the table and the seat may collide.
- 111) The options bed conversion kit for L-shaped seating group or round seating group are not available in combination with the optional premium, round and extendable table.
- 112) Panoramic skylight in living area will not be fitted.
- 113) B-MC T 550: Lowerable bed not available in combination with roof rails.
- 114) The 4 levels in the living area (ceiling, counter, floor and functional lights). Ambient lighting on ceiling in living/sleeping area. Suspended lighting in living area. Light temperature can be adjusted in ceiling area in living/sleeping area. All luminaires controlled via push-buttons can also be dimmed. In addition, there is an all-lights-off feature to switch off all lights inside the vehicle while in bed.
- 115) Only available in combination with comfort habitation door.
- 116) Not available in combination with pull-down bed.
- 117) For weight variants over 3.5 t, truck limits are displayed, not motorhome limits.
- 118) The options warm water heating and Arctic package are only available in combination with Comfort L-shaped seating group.
- 119) Only available in combination with Driver Comfort package.
- 120) The options 5th seating and multifunctional sideboard cancel each other. Only one of these options can be ordered.
- 121) Not available in combination with pull-down bed with single bed feature.
- 122) Not available in combination with bed conversion kit for L-shaped seating group (except B-MC I 580).
- 123) Only available with sleeping comfort system with cup-slatted bed frame for pull-down bed.
- 124) HYMER Smart Battery System (50 Ah) incl. additional 18 A charger and HYMER Smart Battery System (150 Ah) with additional 18 A charger cannot be ordered together. Only one of these options can be ordered.
- 125) LED fog lights are only available in combination with HYMER Full-LED headlights.
- 126) Only available in combination with automatic transmission and cup holder.
- 127) TEC-Tower not available in combination with Thetford cooker/oven combination Aspire or Caprice.
- 128) Not available in combination with Hybrid cooker (gas and induction).
- 129) Hybrid cooker only available in combination with kitchen worktop made of solid surface.
- 130) High-quality round table not available in combination with optional pull-down bed with single bed feature.
- 131) 5th seat only available when ordered from factory. Retro-fitting of the 5th seat is not possible.
- 132) Not available in combination with 5th seating.
- 133) Front overhead lockers only available in combination with electric front roller shutter.
- 134) TEMPMATIK and THERMOTRONIC climate control incl. hinged lid for central storage compartment on the dashboard.

# LEGAL NOTES ON WEIGHT-RELATED INFORMATION

The weight specifications and tests for motorhomes are uniformly regulated throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). We have summarised and explained the key terms and legal requirements from this regulation for you below. Our dealers and the HYMER configurator on our website offer you additional assistance in configuring your vehicle.

## 1. Technically permissible maximum laden mass

The technically permissible maximum laden mass of the vehicle (e.g. 3,500 kg) is a mass specification set by the manufacturer which the vehicle must not exceed. Information on the technically permissible maximum laden mass of the model you have chosen can be found in the technical data. If the vehicle exceeds the technically permissible maximum laden mass in everyday driving, this constitutes an administrative offence which may result in a fine.

## 2. Mass in running order

In simple terms, the mass in running order is the basic vehicle with standard equipment plus a legally fixed standard weight of 75 kg for the driver. This essentially includes the following items:

- the unladen weight of the vehicle together with the bodywork, including operating fluids such as greases, oils and coolants;
- the standard equipment, i.e. all equipment items that are included as standard in the factory-fitted scope of delivery;
- the fresh water tank filled to 100 % in driving mode (driving fill according to manufacturer's specifications; 20 litres) and an aluminium gas cylinder filled to 100 % with a weight of 16 kg;
- the fuel tank, which is 90 % full, including fuel;
- the driver, whose weight – regardless of the actual weight – is generally specified as 75 kg in accordance with EU law.

Information on the mass in running order can be found for each model in our sales documents. It is important to note that the value for mass in running order given in the sales documents is a default value determined in the type-approval procedure and verified by the authorities. It is legally permissible and possible for the mass in running order of the vehicle delivered to you to deviate from the nominal value stated in the sales documents. The legally permissible tolerance is  $\pm 5\%$ . In this way, the EU legislator accounts for the fact that certain fluctuations in the mass in running order occur due to variations in the weight of supplied parts as well as due to processes and weather conditions.

These weight deviations can be illustrated by means of an example calculation:

- Mass in running order acc. to sales documents: 2,850 kg
- Legally permissible tolerance of  $\pm 5\%$ : 142.50 kg
- Legally permissible range of mass in running order: 2,707.50 kg to 2,992.50 kg

The specific range of permissible weight deviations can be found for each model in the technical data. HYMER makes great efforts to reduce weight variations to the minimum that is unavoidable for production reasons. Deviations at the upper and lower end of the range are therefore very rare; however, they cannot be completely ruled out technically, even with all optimisations. The real weight of the vehicle and compliance with the permissible tolerance is therefore checked by HYMER by weighing each vehicle at the end of the line.

## 3. Mass of the passengers

The mass of the passengers is set a standard value of 75 kg for each seat provided by the manufacturer, regardless of the actual weight of the passengers. The mass of the driver is already included in the mass in running order (see no. 2 above) and is therefore not included again. In the case of a motorhome with four permitted seats, the mass of the passengers is therefore  $3 * 75 \text{ kg} = 225 \text{ kg}$ .

## 4. Optional equipment and actual mass of the vehicle

Optional equipment (also: additional equipment) includes, according to the legal definition, all optional equipment parts not included in the standard equipment which are fitted to the vehicle under the responsibility of the manufacturer – i.e. ex works – and can be ordered by the customer (e.g. awning, bicycle or motorbike carrier, satellite system, solar system, oven, etc.). Information on the individual or package weights of the optional equipment that can be ordered can be found in our sales documents. Optional equipment in this sense does not include other accessories that are retrofitted by the dealer or you personally after the vehicle has been delivered ex works.

The mass of the vehicle in running order (see no. 2 above) and the mass of the optional equipment fitted to a specific vehicle at the factory are together referred to as the actual mass. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this specification also represents a standardised value. Since the mass in running order – as an element of the actual mass – is subject to a legally permissible tolerance of  $\pm 5\%$  (see no. 2), the actual mass may also deviate accordingly from the stated nominal value.

## 5. Pay-mass and minimum pay-mass

The installation of optional equipment is also subject to technical and legal limits: Only so much optional equipment can be ordered and fitted at the factory that sufficient free weight remains for baggage and other accessories ("pay-mass") without exceeding the technically permissible maximum laden mass. The pay-mass is calculated by subtracting the mass in running order (nominal value according to sales documents, see no. 2 above), mass of the optional equipment and the mass of the passengers (see no. 3 above) from the technically permissible maximum laden mass (see no. 1 above). The EU regulations stipulate a fixed minimum pay-mass for motorhomes, which must remain as a minimum for baggage or other non-factory-fitted accessories. This minimum pay-mass is calculated as follows:

Minimum pay-mass in kg  $\geq 10 * (n + L)$

Where: "n" is the maximum number of passengers plus the driver and "L" is the overall length of the vehicle in metres.

For a motorhome with a length of 6 m and 4 approved seats, the minimum pay-mass is therefore e.g.  $10 \text{ kg} * (4 + 6) = 100 \text{ kg}$ .

To ensure that the minimum pay-mass is maintained, there is a maximum combination of optional equipment that can be ordered for each vehicle model. In the above example with a minimum pay-mass of 100 kg, the total mass of optional equipment for a vehicle with four permitted seats and a mass in running order of 2,850 kg should not exceed 325 kg:

3,500 kg technically permissible maximum laden mass  
- 2,850 kg mass in running order  
- 3\*75 kg mass of the passengers  
- 100 kg minimum pay-mass  
= 325 kg maximum permissible mass of optional equipment

It is important to note that this calculation is based on the default value for mass in running order as defined in the type-approval procedure, without taking into account the permissible weight deviations for mass in running order (see no. 2 above). If the maximum permissible value for the optional equipment of (in the example) 325 kg is almost or completely exhausted, an upward weight deviation can therefore result in the minimum pay-mass of 100 kg being met mathematically using the default value for the mass in running order, although in fact there is no corresponding load capacity. Here, too, an example calculation for a vehicle with four seats, whose real weighed mass in running order is 2 % above the nominal value:

3,500 kg technically permissible maximum laden mass  
- 2,907 kg real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)  
- 3\*75 kg mass of the passengers  
- 325 kg optional equipment (maximum permissible value)  
= 43 kg actual load capacity (< minimum pay-mass of 100 kg)

In order to avoid such a situation, HYMER further reduces the maximum permissible weight of the total optional equipment that can be ordered on a model-specific basis. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by HYMER.

Since the weight of a specific vehicle can only be determined when it is weighed at the end of the line, in very rare cases a situation may arise in which the minimum pay-mass at the end of the line is not guaranteed, despite this limitation of optional equipment. In order to guarantee the minimum pay-mass even in these cases, HYMER will check together with your trade partner and you before delivery of the vehicle whether, for example, the vehicle is loaded up, seats are reduced or optional equipment is removed.

## **6. Effects of tolerances of the mass in running order on the pay-mass**

Regardless of the minimum pay-mass, you should note that unavoidable production-related fluctuations in the mass in running order – both upwards and downwards – have a mirror-image effect on the remaining load capacity: If you order our example vehicle (see no. 3. above), for example, with optional equipment with a total weight of 150 kg, the calculated pay-mass based on the default value for the mass in running order is 275 kg. The load capacity actually available may deviate from this value due to tolerances and may be higher or lower. If the mass in running order of your vehicle is, for example, permissibly 2 % higher than stated in the sales documents, the load capacity is reduced from 275 kg to 218 kg:

3.500 kg technically permissible maximum laden mass  
-2.907 kg real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)  
-3\*75 kg mass of the passengers

-150 kg optional equipment ordered for the specific vehicle  
= 218 kg actual load capacity

As a precaution to ensure that the calculated pay-mass is actually given, you should therefore take the possible and permissible tolerances for the mass in running order into account when configuring your vehicle.

We also recommend that you weigh the laden motorhome on a non-automatic scale before each journey and, taking the individual weight of the passengers into account, determine whether the technically permissible maximum laden mass and the technically permissible maximum mass on the axle are observed.

## Please note:

This price list describes the series status at the time of publication. Despite careful checking of the content, printing errors cannot be ruled out completely. We reserve the right to make equipment changes or product improvements. Before signing a sales contract, please ask one of our approved HYMER dealers about the current product and series status.

Some vehicles are shown with optional extras that are available in the current applicable price list and are available at extra cost. The decoration shown is not supplied by HYMER.

The data complies with the European homologation regulations which may change up to the time of vehicle purchase or delivery. Your HYMER dealer will gladly provide you with information on the changes as well as the standard scope of delivery.
